5	Chatime	cafe	—	102.0 m

Summary statistics

- **Total matching mapped establishments within radius:** 204
- **Distance to closest match:** 64 m

Indicative competition assessment

Indicative competition assessment: higher. The OpenStreetMap query identified 204 mapped cafe establishment(s) within the search radius. The nearest mapped cafe is approximately 64 metres away. Note: a direct competitor is very nearby (under 250 m), which may strongly affect footfall and visibility. Validate these results through local field research and a clearer definition of the intended concept before making a location decision.

Limitations

OpenStreetMap is a crowd-sourced dataset. Coverage and metadata (such as opening hours or websites) can be incomplete, outdated, or missing entirely in some areas, and business closures are not always reflected quickly. This report is an exploratory indication only — validate findings through local field research, official business registers, and a clearer definition of the intended concept before making a real location decision.
